

ADVANTAGES OF PUBLISHING IN *JOURNAL OF CRUSTACEAN BIOLOGY*

- Premier journal on all aspects of crustacean biology, aquatic as well as terrestrial and fossil
- Free page charges for members of The Crustacean Society, with special dues for students (join here today if you are not a member:
<https://birenheide.com/tcs/membership/membership.php>)
- Lightning fast review process and decision time: We averaged 36 days from submission to online Advance Access in 2018!
- Rapidly rising impact factor (1.064 in 2016 to 1.119 in 2017)
- High ranking (66 out of 106 among journals in marine and freshwater biology; 82 out of 167 among zoology journals)
- Variety of article submission options including research articles, short research notes, and subject review articles
- Open-access option
- Distinguished Editorial Board
- Now published by Oxford University Press which guarantees a smooth submission process from start to finish and high-quality
- Easy access to ALL author metadata: From the amount of attention their online Advance Access articles (<https://academic.oup.com/jcb/advance-articles>) and printed articles (<https://academic.oup.com/jcb>) are receiving, from number of downloads to the attention by the press and social media
- Held within the following Clarivate databases: *Science Citation Index*, *Science Citation Index Expanded*, *Current Contents®/Agriculture, Biology, and Environmental Sciences*, *Zoological Record*, and *BIOSIS Previews*. Additional abstracting and indexing in *CABI*, *EBSCO*, *ExLibris*, *OCLC*, *ProQuest*, *TDNet*, and *Yewno*

Revised 27 January 2019

JOURNAL OF CRUSTACEAN BIOLOGY: INSTRUCTIONS TO AUTHORS

Scope. The *Journal of Crustacean Biology (JCB)* is the official journal of The Crustacean Society (TCS). *JCB* is a peer-reviewed, bimonthly scientific journal containing articles of broad interest on the biology of crustaceans and other marine arthropods and pertinent TCS announcements. Articles are published in English only. See current online issues here:

<https://academic.oup.com/jcb/issue>

Editor-in-Chief. Peter Castro (Professor Emeritus, California State Polytechnic University, Pomona, CA, USA); e-mail: jcb@cpp.edu

Ethical and Legal Conditions. Authors should observe high standards with respect to publication ethics as set out by the [Commission on Publication Ethics \(COPE\)](#). Falsification or fabrication of data, plagiarism (including duplicate publication of the authors' own work) without proper citation, and misappropriation of the author's work are all unacceptable practices. Any cases of ethical misconduct are treated very seriously and will be dealt with in accordance with the COPE guidelines.

Submissions. Authors are asked to submit their manuscript online via the Editorial Manager (EM) online submission system at <http://jcb.edmgr.com/>. First-time users of the EM site need to register first. Go to the website and click on the "Register Now" link in the login menu. Enter the information requested.

Select e-mail as your preferred method of contact when you register. Upon successful registration, you will receive an e-mail message containing your Username and Password. If you should forget your Username and Password, click on the "Send Username/Password" link in the login section, and enter your first name, last name, and e-mail address exactly as you had entered it when you registered. Your access code will then be e-mailed to you.

Prior to submission, authors are strongly encouraged to carefully read these instructions. When submitting via the website, you will be guided step-by-step through the submission process. A revised document is uploaded the same way as the initial submission. The system automatically generates an electronic (PDF) proof, which is then sent for reviewing purposes. All correspondence, including the editor's request for revision and final decision, is sent by e-mail.

Peer Review. All submissions to the journal are initially reviewed by the Editor-in-Chief and/or an assigned Associate Editor. At this stage manuscripts may be rejected without peer review, if it is deemed that they are not of high enough quality or outside the scope of the journal. This fast rejection process means that authors are given a quick decision and do not need to wait for the review process.

Manuscripts that are not rejected are sent out for peer review, usually to at least two independent reviewers. Based on the feedback from these reviewers and the judgment of the Associate Editor and the Editor-in-Chief, a decision is rendered on the manuscript. Suggestions for revisions are then sent to the author.

For information on the journal's review process or a manuscript's progress, please check your Author Area in the EM site or contact the *JCB* Editorial Office at jcb.editorialoffice@oup.com.

The editorial board strives to keep the review process as short as possible and aims to inform the author of a decision within two months after submission.

Language. *JCB* accepts American or British spelling, which must be consistently applied throughout. Metric units of measurement are to be used. Authors whose native language is not English must take particular care. We recommend that such authors either involve a native speaker, someone who is highly proficient in writing scientific English, or consult an organization for editing assistance (please see Language Editing below).

Language Editing. Language editing does not guarantee that your manuscript will be accepted for publication. Please [click here](#) for further information on available services. Authors are liable for all costs associated with such services.

FORMAT AND STYLE OF MANUSCRIPTS

The text should be concise and clear and contain no footnotes. The original manuscript must be double-spaced, leaving margins of at least one inch. Please insert double spacing above headings, number pages consecutively at the top right-hand corner, and use 12 pt Times New Roman font. Manuscripts must be uploaded as an editable Word document. Correspondence regarding the format and style of manuscripts should be sent to the Editor-in-Chief.

Manuscripts must strictly conform to *JCB* format and style. Please consult a *JCB* number published starting in 2017 or later. The sequence of material should be:

- 1) "Running head" (in capital letters, starting with the name of author or authors plus *et al.*, and an abbreviated title)
- 2) **Title** (centered, in **bold**)
- 3) author(s) (all centered: first name in full plus initial of a second name, surname (hyphenated if more than one);
- 4) *affiliation(s) of author(s), address including postal code* (in *italics*)
- 5) "*Correspondence*" (name and e-mail of corresponding author; in *italics*)
- 6) "ABSTRACT"
- 7) "**Key Words**" (in alphabetical order and not repeating any terms appearing in title)
- 8) main text
- 9) list of supplementary material with short caption
- 10) "ACKNOWLEDGEMENTS"
- 11) "REFERENCES"
- 12) list of figure captions

The abstract should not exceed one doubled-spaced page. It should include: 1) the reason for undertaking the research, 2) a summary of important findings, and 3) implications of these findings.

All generic and binomial names must be in italics and followed by the authority. The actual reference for the authorities of genera and species of Crustacea only, but not of suprageneric taxa, must also be included in “References.” The World Register of Marine Species (WoRMS) [<http://www.marinespecies.org/>] is an excellent source of information on authorities and associated references. You are not required to supply the references for taxonomic authorities for articles focusing on areas such as biochemical processes, genetics, genomics, and physiology, unless stipulated by the Editor-in-Chief.

All publications referred to in the text must be listed in “References.” References of three or more authors will be cited in the text using the surname of the first author followed by “*et al.*” Multiple references cited in the text must be arranged chronologically (not alphabetically) and separated by semi-colons: “(Herreid & Full, 1988; Boxshall & Halsey, 2004).”

Do not use coding in the references in the body of the text or in the list of references.

Titles in “References” must be arranged alphabetically by the surname of the first author followed by initials (no space between initials) and, if having two or more authors with the same first author, must be listed alphabetically by second author, not chronologically. Titles with two authors are listed before those with three or more authors with the same first author. Titles of periodicals must be written in full and in italics, followed by a comma and volume number in **bold**, with en-dashes (–) between page numbers, as follows:

Wehrtmann, I.S., Magalhães, C. & Orozco, M. 2014. Freshwater crabs in Lake Atitlán, Guatemala: not a single-species fishery. *Journal of Crustacean Biology*, **34**: 123–125. [cited as “Wehrtmann *et al.* (2014)” or “(Wehrtmann *et al.*, 2014)” in text]

Articles available only online (or still in press ready to be published as a printed article) must be accompanied by a doi number:

Yasuhara, M. & Myhre, S.E. 2016. Biodiversity-ecosystem functioning relationships in long-term time series and palaeoecological records: deep sea as a test bed. *Philosophical Transactions of the Royal Society B: Biological Sciences*, **371**: 20150282 [doi: 10.1098/rstb.2015.0282].

Book titles are to be cited in *italics*, followed by publisher, city, and country (in cases where city is not a large one and where country is not obvious to the reader):

Boxshall, G.A. & Halsey, S.H. 2004. *An introduction to copepod diversity*. The Ray Society, London. [cited as “Boxshall & Halsey (2004)” or “(Boxshall & Halsey, 2004)” in text]

Articles in a book:

Herreid, C.F. & Full, R.J. 1988. Energetics and locomotion. In: *Biology of the land crabs* (W.W. Burggren & B.R. McMahon, eds.), pp. 337–377. Cambridge University Press, Cambridge, UK. [cited as “Herreid & Full (1988)” or “(Herreid & Full, 1988)” in text]

Theses:

Treat as books, with university (together with location) instead of publishers, indicating if it is a Ph.D., M.S., M.A., or M.Sc. thesis:

Feng, L. 2011. *The effect of dietary HUFA on the ovary development and tissue biochemical composition of the swimming crab P. trituberculatus*. M.S. thesis, Shanghai Ocean University, Shanghai, China.

A manuscript model ([click here](#)) provides additional detailed instructions for the preparation of manuscripts.

DESCRIPTION OF NEW TAXA

Any descriptions of single species must be accompanied by discussions or reviews that apply information gained from the new species to broader questions of systematics/phylogeny, biogeography/ecology, and/or comparative biology. Unless justified, the authors of new taxa should not exceed three, and the authors of the article describing such taxa should be the same. New names of taxa must be proposed in accordance with the relevant Articles of the International Code of Zoological Nomenclature (ICZN) [<http://www.iczn.org/iczn/index.jsp>] and with due attention to the Code's Appendix A (Code of Ethics) and Appendix B (General

Recommendations, particularly concerning the establishment and formation of new names). Descriptions must be in telegraphic style.

Immutable Advance Access. *JCB* publishes articles online ahead of inclusion in an issue via OUP's Advance Access.

In order to comply with the requirements of ICZN with regard to nomenclatural works, ALL articles, regardless of whether they include nomenclatural information, that are published in *JCB* will be immutable from their publication date; this means that no changes will be allowed to any article without the publication of an erratum clearly stating the changes that have been made. Therefore, it is the responsibility of the authors to carefully check their proofs for accuracy, and to notify the publisher of any changes that are necessary prior to Advance Access publication.

Nomenclatural Works. Articles describing new taxa and other proposing nomenclatural and/or taxonomic acts (establishment of neotypes, new name combinations, etc.) are first published online as Advance Access. You will be asked during the submission process whether your article contains a nomenclatural act such as the description of a new taxon. For such an electronic publication to be an available work, the ICZN requires new taxa to be accompanied by a ZOOBANK registration number (LSID), which will be obtained by the Editor-in-Chief. We will insert a nomenclatural statement, which includes the LSID number, into the article. Your article will also include the online publication date, and the statement "Version of Record, first published online [online publication date], with fixed content and layout in compliance with Art. 8.1.3.2 ICZN."

GENETICS AND GENOMICS MANUSCRIPTS

Journal of Crustacean Biology will consider manuscripts on gene cloning studies only if they can improve our understanding on some aspects of crustacean biology. We prefer including functional studies and manipulative experiments that can elucidate the physiological functions

of the gene concerned, other than only presenting expression profiles of the gene in different tissues and/or life history stages of the species.

FIGURES AND TABLES

Figure and table files must be uploaded separately onto the Editorial Manager site of *JCB* at the same time as the submission of the manuscript (see above). All table and figure captions must be self-explanatory and not include reference to the manuscript text. Please upload figures as .tiff files (.jpg, .jpeg, or .eps files are not acceptable) at a resolution of 600 dpi for line art and 300 dpi for photo art. Table files must be in Word format. All figures and tables should be cited in the main text following strict numerical order. The approximate positions of figures and tables will be indicated in the text file by the Editor-in-Chief.

Figures must be in final form for printing, and all lettering should be of professional quality and be provided by the author(s). Multiple components of figures should be designated in uppercase letters, for example Figure 1A and Figure 1B. Figure captions for all illustrations should be printed together on one or more separate pages and should always mention the complete binomial name(s) of the species concerned, if relevant.

For more detailed information on how to submit figure files, please see the Oxford Journals page on figures <http://oxfordjournals.org/en/authors/figures.html>. You can also send queries about figure files to the *JCB* Editorial Office at jcb.editorialoffice@oup.com.

Each table must be provided with a concise and clear heading and be numbered with an Arabic numeral. The formatting of tables should be consistent throughout the manuscript. Vertical rules should be avoided. Tables and figures should be kept to a minimum; authors are strongly encouraged to include figures and long tables as Supplementary Material (see below).

SUPPLEMENTARY MATERIAL

Submit all material to be considered as supplementary material, which consists of tables, figures, and/or appendices that will not appear in the printed issue, but that will be available to readers of *JCB* online. Ensure that the supplementary material is referred to in the manuscript. The authors should also ensure that these files are clearly and succinctly presented, that the style conforms with the rest of the manuscript, and that the presentation will work on any Internet browser. It is not recommended for the files to be more than 2 MB each, although exceptions can be made at the Editorial Office's discretion.

RESEARCH NOTES

Manuscripts for Research Notes should not exceed 10 pages. The format, style, and sequence of material must be the same as that of regular research articles (see above) except that the text itself will not be subdivided into sections ("Introduction," "Material and Methods," etc.). The abstract must be short and concise.

PUBLICATION COSTS

Page charges (£75/US\$120/€90) are optional for TCS members, mandatory for non-members. Page charges will be waived to TCS members for the first 12 pages of the typeset article, which will be determined when the proof is ready for author approval. To qualify for the page-charges waiver, at least half of the authors of a manuscript must be TCS members at the time of submission. Please check membership status and obtain membership numbers from Burk Inc tcs@burkinc.com. All authors are nevertheless required to pay for color figures appearing in the printed version (£220/US\$350/€264 per figure). Color figures are free for the online version.

PROOFS

Authors will receive a link to the PDF proof of their article on our online system by email, so it is essential that a current email address be supplied at submission. Proofing instructions will accompany the PDF file but the proof should be checked immediately upon receipt and uploaded in accordance with the instructions. Only essential corrections should be made at the proof stage.

Accepted manuscripts arrive at OUP and go through the production process until the final versions are ready to publish. These are then published on Advance Access, remaining on this page until they appear in a printed issue.

OFFPRINTS

All contributors of published articles will have free online access to the PDF and HTML version of their article, to which links can be created from an institutional or firm website.

COPYRIGHTS AND CONSENT TO PUBLISH

Transfer of Copyright. By submitting a manuscript, the author agrees that the copyright for the article shall be transferred to The Crustacean Society if and when the article is accepted for publication. For that purpose, the author needs to sign online the License to Publish that will be sent via a link in the “Welcome Email” to the author when the article is first entered into production at Oxford University Press.

Third-Party Copyrights. In order to reproduce any third-party material, including tables, figures, or images, in an article, authors must obtain permission from the copyright holder and be compliant with any requirements the copyright holder may have pertaining to this reuse. When seeking to reproduce any kind of third-party material, authors should request the following:

- nonexclusive rights to reproduce the material in the specified article and journal
- print and electronic rights, preferably for use in any form or medium
- the right to use the material for the life of the work
- worldwide English-language rights

It is particularly important to clear permission for use in both the print and online versions of the journal; we are not able to accept permissions which carry a time limit because we retain journal articles as part of our online journal archive. Further guidelines on clearing permissions can be found [here](#).

If you will be publishing your article under an Open Access license but it contains material for which you do not have Open Access reuse permissions, please state this clearly by supplying the following credit line alongside the material:

Title of content

Author, Original publication, year of original publication, by permission of [rights holder]

Conflict of Interest. Oxford University Press requires declaration of any conflict of interest upon submission online. If the manuscript is published, conflict of interest information will be communicated in a statement in the published article.

Permissions and Self-Archiving

<http://www.oxfordjournals.org/en/access-purchase/rights-and-permissions.html>

<http://www.oxfordjournals.org/en/access-purchase/rights-and-permissions/self-archiving-policy.html>

Open Access. *JCB* authors have the option to publish their article under the Oxford Open initiative, whereby, for a charge (see below), their article will be made freely available online immediately upon publication.

After your manuscript is accepted, the corresponding author will be required to accept a mandatory license-to-publish agreement. As part of the licensing process you will be asked to indicate whether or not you wish to pay for open access. If you do not select the open access option, your article will be published with standard subscription-based access and you will not be charged.

Licenses. Authors publishing in *JCB* can use the following licenses for their articles:

- Creative Commons Attribution license (CC BY)
- Creative Commons Non-Commercial license (CC BY-NC)

Please [click here](#) for more information about Creative Commons licenses.

CHARGES.

The Open Access charges are as follows:

- TCS member charge: £1400 / \$2240 / €1764
- Regular charge: £1750 / \$2800 / €2205
- Reduced developing-country charge*: £875 / \$1400 / €1103
- Free developing-country charge*: £0 / \$0 / €0

*Visit our developing countries page ([click here](#) for a list of qualifying countries).

You can pay Open Access charges using our Author Services site. This will enable you to pay online with a credit/debit card or request an invoice by email or post.

Please note that if an author elects to publish under Open Access, page charges do not apply and the author will be eligible for one free color figure.

Orders from the UK will be subject to the current UK VAT charge. For orders from the European Union, OUP will assume that the service is provided for business purposes. Please provide a VAT number for yourself or your institution, and account for your own local VAT correctly.
